GOALS

Fullstack Developer and Computer Science student focusing on Front-end development with projects done for many companies. I like to solve problems and build websites. I developed communication, cooperation and mainly CSS proficiency over my career.

Knowledge in screen building, bug fixing, performing maintenance on a regular basis and creating new functionalities. Extensive familiarity with SQL Language, RestFul API's, Javascript frameworks, data analysis and version control systems. Always looking for improvement, learning new techs and adding value to the place I work.

EDUCATION

Federal Institute of Minas Gerais | Bachelor

02/2017 - 06/2023

- Computer Science

EXPERIENCES

Petgenda - Front-End Developer

06/2023 - Today

For Petgenda, I'm responsible for implementing all front-end. My responsibilities are to build reusable components, responsive design and scalable architecture. Our main goal is to deliver an excellent app to the final user and an easy-to-learn system.

- Nuxt, TailwindCSS, Javascript, Supabase

Prumo Enginnering - Fullstack Developer

11/2022 - 07/2023

For Prumo, I was responsible for performing maintenance, fixing bugs, extracting, analyzing data, building new functionalities for mobile apps and web systems. Our primary challenge was to adapt the systems to the company necessities, constantly making data reports, graphs and synchronizing them with web apps.

- Angular, Typescript, Laravel, Ionic, MySQL, ChartJS

R2DA Technology - Fullstack Developer

12/2021 - 12/2022

As I served for R2DA Tech, our team provided services for public organizations, registry offices and universities. Our applications were mainly based on Atomic Design and SOLID concepts, my responsibilities were to implement the proposed designs using UI Libraries as we use agile methodologies to guide the process.

- Vue, React, Spring Boot, PostgreSQL, GitHub, Vuetify, JWT, Javascript

Avante Digital Solutions - Fullstack Developer

04/2021 - 10/2021

Collaboration, creation and maintenance of Avante Web, business management system, which provides transaction and tax pay services for local companies and small businesses

- HTML, CSS, Primefaces, Java, Bootstrap, SQL Server
